

ALICE IN SABINE PARISH

2014 Point-in-Time Data

Population: 24,286 | **Number of Households:** 9,174

Median Household Income: \$36,513 (state average: \$44,555)

Unemployment Rate: 10.6% (state average: 7.5%)

ALICE Households: 27% (state average: 23%); **Poverty Households:** 21% (state average: 19%)

How many households are struggling?

ALICE is an acronym for Asset Limited, Income Constrained, Employed – households that earn more than the Federal Poverty Level, but less than the basic cost of living for the parish (the ALICE Threshold, or AT). Combined, the number of poverty and ALICE households equals the total population struggling to afford basic needs. The number of households below the ALICE Threshold changes over time; households move in and out of poverty and ALICE as circumstances improve or worsen. The Great Recession, from 2007 to 2010, caused hardship for many families. Conditions started to improve between 2010 and 2014 for some, but not for all.

Households by Income, 2007 to 2014

What does it cost to afford the basic necessities?

The bare-minimum Household Survival Budget does not include any savings, leaving a household vulnerable to unexpected expenses. ALICE households typically earn above the Federal Poverty Level of \$11,670 for a single adult and \$23,850 for a family of four, but less than the Household Survival Budget.

Household Survival Budget, Sabine Parish

	SINGLE ADULT	2 ADULTS, 1 INFANT, 1 PRESCHOOLER

How many families with children are struggling?

Children add significant expense to a family budget, so it is not surprising that many Sabine Parish families with children live below the ALICE Threshold. Though more Sabine Parish families are headed by married parents, those families with a single parent are more likely to have income below the ALICE Threshold.

Families with Children by Income, 2014

What assets do households have?

Ownership of assets can contribute to stability of households. Yet few families in Sabine Parish own liquid assets, such as a savings account, 401(k) plan, or rental income, that are readily available to cover emergency expenses. Vehicles, the most common asset, depreciate over time. Homeownership, the next most common asset, can build wealth, but is not a liquid asset.

Assets, All Households, 2014

Town	Total HH	% ALICE & Poverty
Belmont	261	34%
Converse	155	58%
Florien	182	63%
Fort Jesup	155	44%
Many	1,014	70%
Pleasant Hill	275	52%
Zwolle	724	60%

ALICE is an acronym for ALICE Threshold Income. It is the amount of income that a family with children needs to afford the state's necessities. The ALICE Threshold is calculated by adding up the costs of housing, food, transportation, and other necessities. The number of households that are below the ALICE Threshold is the number of households that are struggling to afford the state's necessities. The ALICE Threshold is a measure of the economic well-being of a community. It is a way to see how many families are struggling to afford the state's necessities. The ALICE Threshold is a measure of the economic well-being of a community. It is a way to see how many families are struggling to afford the state's necessities.

What does it cost to afford the state's necessities? The ALICE Threshold is a measure of the economic well-being of a community. It is a way to see how many families are struggling to afford the state's necessities. The ALICE Threshold is a measure of the economic well-being of a community. It is a way to see how many families are struggling to afford the state's necessities.

Note: Municipal-level data on this page is for Places, which include Census Designated Places (CDP). These are overlapping geographies so totals will not match parish-level data. Municipal-level data often relies on 5-year averages and is not available for the smallest towns that do not report income.
